

## THE SAFE-TAINER™ SYSTEM FOR FRESH AND WASTE MATERIAL

### OUR OFFERING:

-  NEU-TRI™ E SAFE-TAINER systems
-  SAFE-TAINER systems for waste material
-  Consultancy & Training by experts
-  HI-TRI™ SMG SAFE-TAINER systems
-  SAFECEM Service Elements
-  SAFECEM Accessories

### Why should you give back your waste material in the SAFE-TAINER system?

• You need to know how much solvent you have actually given back in your waste material to meet the requirements of the VOC-directive.

⇒ Choose the SAFE-TAINER system and profit from the waste analysis provided by SAFECEM!

• You need to protect your workforce.

⇒ Choose the SAFE-TAINER system and profit from enclosed solvent transfer and the fact that only trained operators can access the solvent!

• We need to protect our environment.

⇒ Choose the SAFE-TAINER system and profit from closed solvent transfer and double-walled storage!

• You are personally responsible for the waste generated by your company and need to ensure that it is disposed of in a legal and environmental friendly way.

⇒ Choose the SAFE-TAINER system and profit from its innovative design to assure safe storage, transportation and traceability!

• You need to contribute to the Sustainability of Trichloroethylene cleaning solvent and therefore should consider appropriate waste disposal techniques.

⇒ Choose the SAFE-TAINER system to contribute to the long-term viability of this high-quality indispensable product!

• You need to be in compliance with all current regulations.

⇒ Choose the SAFE-TAINER system and profit from this unique state of the art closed loop delivery system to be inline with all relevant legislations!

• You should only settle for the best-available technology and best-available full-package-solution.

⇒ Choose the SAFE-TAINER system and profit from the closed loop delivery system as well as from Service Elements and Original Accessories!
